Of the Suns entrance into the four Cardinal Signes.

THe Sun enters *Aries* this year on the 9 day of *March*,
14 minutes past 11 at night.

He enters *Cancer* on the 11 day of *June*, about 2 in
the morning.

He enters *Libra* on the 12 day of *September*, 10 mi-
nutes past 5 after noon.

He enters *Capricorn* on the 11 of *December*, near
5 in the morning.

Times Prohibiting Marriage.

MArriage comes in on the 13 of January,
and by Septuagesima Sunday it is out
again untill Low Sunday; at which time it comes
in again, and goes no more out till Rogation-
Sunday: From whence it is forbidden again un-
till Trinity-Sunday; from thence it is unforbid-
den till Advent-Sunday. But then it goes out,
and comes not in again untill the 13 day of Ja-
nuary next after.

And note that the Golden Number this year is 17

} 1669.

The Anatomy of Mans body, as the parts
thereof are governed by the twelve Signs.

Brief Rules of Husbandry.

PLant and graff the MOON increasing in *Taurus*, or
Aquarius, the wind not Eastonly.

Fell timber from Midsummer till Christmas, the MOON
increasing.

Fell Coppice and Fewel, the MOON in the first quarter.

Cut your Vines in February or March.

Geld Cattel the MOON in *Aries*, *Sagittarius*, or *Capricorn*.

Remove trees, the MOON at the last quarter in Novemb.

Shear sheep, and cut hair to grow the MOON increasing.

To keep thy hair safely from falling untimely,

Hot scalding baths deny, hate wanton company,

Abstain from Venerie, purge choler warily,

Let thee bloud needfully, surfer not willingly.

Of the four quarters of the year.

The Vernal quarter derives his name à *virando*, from flourishing; *quia tunc omnia virent & florent*, because all things then flourish: this being the first quarter in the year, as appeareth by the old distich.

*Omnia cum vireant, tunc est nova temporis ætas:
Sic annus per Ver incipiendus erit.*

This quarter beginneth March the 9, the Sun then entering into the first degree of *Aries*, producing the first Equinox; and continueth till June the 10: in which time the Sun runneth through *Aries*, *Taurus*, & *Gemini*. It is a Quarter naturally (though accidentally it sometime prove otherwise) hot and moist, resembled to the *African* region of the world, the South-wind, the *Fire*, the Sanguine complexion, and to infancy. The ordinary diseases (according to the common course) of this quarter be Leproses, Red-spots, Feavers of blood, small pox, with other infirmities proceeding of blood.

The *Æstival* quarter is next. It beginneth June the 11, the Sun then entering into the first degree of *Cancer*: and continueth till September the 12: during which time the Sun runneth through these three celestial constellations, viz. *Cancer*, *Leo* and *Virgo*. It deriveth the name ab *æstu*, from the exceeding heat which useth to be now, as also the English word Summer doth: for it is called summer, *quasi* sun mehr, as the Germans speak; that is, *plus solis*, because we have more of the sun then, then at any other time.

This quarter is naturally hot and dry, resembled to the *Oriental* region of the world, to the East, to Cholera, to Youth. The sicknesses agreeing herunto be
Hæmo-

Stomach-aking, Posthumes, pestilent Feavers, Jaundise, with other infirmities proceeding of choler, According to the Arabians this is the first quarter of the year, who hold that the Sun was made in Leo: and their reason is, because the Lion is the house of the Sun. Mercator in his Chronologie is of the same minde, but backs his opinion very weakly.

The Autumnal quarter beginneth September the 12, the Sun entring into the first degree of *Libra*, producing the second Equinox; and continueth till the 10 of December: in which time the Sun runneth through *Libra*, *Scorpio*, and *Sagittarius*.

This quarter the Jews own for the first quarter of the year: and their reason is, *quia tempus est fructuosum*, because it is a time of fruit; according to that in the Scripture, *Et protulit terra herbam viventem facientem fructum juxta genus suum*, And the earth brought forth the green herb yeelding fruit according to its kind. It is a quarter naturally cold and dry, resembled to the Septentrional-region of the world, to the North wind, to the Earth, to Melancholy, and to the declining age of man. The diseases properly incident to it be paining in the back, darkness of sight, retention of urine, also the canker, fistuloes, emroids, with other infirmities proceeding of melancholy.

The Hyemal or winter quarter (being naturally cold & moist, resembled to the Occidental-region of the world; to the west, to water, to flegm, and to old age) beginneth December the 10, the Sun then entring into the first degree of *Capricorn*; and continueth till March the 9: in which time the Sun runneth through these three celestial signs, viz. *Capricorn*, *Aquarius*, and *Pisces*.

This quarter, though of us accounted the last, yet by *Numa Pompilius* it was accounted the first, and that
for

Year 1669.

for this reason; quia tunc Sol ad nos ascendere incipit; because the Sun then begins to ascend the Ecliptick: Whence the Poet, Ovid by name,

Bruma novi prima est veterisque novissima solis:

Principium capiunt Phœbus & Annus idem.

The diseases incident to this quarter be commonly pushed in the face, tooth-ach, scabs, fluxes of blood by the inferiour parts, pallsies, gout, with other diseases proceeding of flegme.

A medicine for the Gout.

The roots of Comfrey taken fresh, beaten small, and spread upon leather, and laid upon any place troubled with the Gout, doth presently give ease of the pains, as by often experience hath been found. It is good also for pains in the joynts, Gangrens, and is very profitable for running and moist ulcers.

A medicine for a Boyl.

The herb Balm is an herb of *Jupiter*, and under *Cancer*. This herb, if it be bruised and boyled in a little wine and oyl, and laid warm on a Boyl, it will ripen and break it.

A medicine to cure Numbness, &c.

Take an oyl made of the Berries of the Bay-tree, and therewith anoint the place, for it is very comfortable in all cold griefs of the joynts, Nerves, Arteries, Stomach, Belly or Womb; and helpeth Palsies, Cramps, Convulsions, Aches, Trembling and Numbness in any part; weariness also and pains that come by sore travelling.

A medicine for womens breasts.

Bean flower made into a Pultis is good to as-
swage Inflammations rising upon wounds, & to help
the swellings of womens breasts caused by the curd-
ling of their Milk, repressing their Milk, &c.

Against Chilblains or Kibes.

Take the common white Beet, & boyl the leaves
thereof in water: then take and lay them upon
Kibes or Chilblains, and it will help them.

Against the Tooth-ach.

The decoction of Wood Betony made in Wine,
and gargled in the mouth, easeth the Tooth-ach.
This herb is appropriated to the Planet *Jupiter*, and
the sign *Aries*. A decoction of Hysop in vinegar
will do the like: it must be sodden to halfe.

Good against the Itch.

The leaves of the Bramble or Black-berry-bush
boyled in Lie, and the Head washed therewith,
healeth the Itch and the running sores thereof, but
will die the Hair into a black, or at the least make
it blacker then it was before.

Good against Deafness.

The juice of either the Winter or Summer-savo-
ry heated with a little of Roses, and dropped in-
to the ears, easeth them of the Noise and Singing
in them, and of Deafness also.

Good

Pond 1669.

Good against Worms:

The seed of Purslane bruised and boyled in wine, and given to children, expelleth the Worms.

Good for the Liver and Spleen.

The decoction either of the Leaves or Bark of the Maple-tree, is very good to strengthen the Liver: and is also good to open obstructions both of the Liver and Spleen, and easeth pains of the sides proceeding from thence.

For a sore Mouth or Throat.

The flowers of Mallows boyled in oyl or water, whereunto a little Honey and Allum is put, is an excellent Gargle to wash, cleanse, and heal any sore Mouth, or Throat, in a short space.

For a broken-winded Horse.

The herb Lungwort boyled in Beer is an excellent remedy for broken-winded Horses: which you may give them as you give any other Drink.

For a Pin and web in the Eye.

The fine powder of Liquoris blown through a Quil into the eyes that have a Pin and Web (as they call it) or Rheumatick Distillations into them, doth cleanse and help them.

For the Ague.

The Decoction of the leaves and seeds of Saint Johns-wort being drunk somewhat warm before

the fits of Agues, whether they be Tertians or Quartans, doth alter the fits, and by often using doth take them quite away.

The vertues of Clove-Gilli-flowers as they be set down by Mr Culpeper in his English Physician.

They are gallant fine temperate flowers, of the nature and under the dominion of *Jupiter*; yea, so temperate, that no excess, neither in heat, cold, driness, nor moisture can be perceived in them. They are great strengtheners both of the Brain & Heart, and will therefore serve either for Cordials or Cephalicks as your occasion is. There is both a Syrup and a Conserve made of them: to take now & then a little of either, strengthens nature much, to such as are in Consumptions. They are also good in hot Pestilential Fevers, and expell poyson.

Sed contra vim mortis non est medicamen in hortis.

Statutum enim est omnibus semel mori, Heb. 9. 27.

Other Physical Observations.

Let blood at no time without great cause; for it bringeth weakness and many infirmities. If ye do, see it be after good digestion and fasting, in a fair temperate day, if it may be. Beware before of all manner of exercises, as bathing, watching carnal copulation, &c. After, use fine meats of light digestion; abstaining from all aforesaid until the 4th day.

These

Pond 1669.

These Signes are ill for bloud-letting, the Moon being in them, viz. *Taurus, Gemini, Leo, Virgo, and Capricorn*, with the last half of *Libra* and *Scorpio*: the rest are all good, if the Moon bear no dominion in that member which ye cut.

Furthermore, in letting of bloud you must know what persons are fit to bleed, and what not: and if they be fit, how it is with the patient inwardly, for his complexion and age; outwardly, for the time of the year, time of the moneth, day, and diet.

For Complexion.

For the Flegmatick, let the Moon be in *Aries* or *Sagittarium*: for the Melancholy, in *Libra* or *Aquarius*: for the Cholerick, in *Cancer* or *Pisces*: and for the Sanguine, in any of the aforesaid, *Luna signum membro dominans peragrans*.

For age let bloud.

In youth, from the change to the first quarter.
In middle age, from the first quarter to the full.
In elder age, from the full to the last quarter.
In old age, from the last quarter to the change.

For the time of the year.

The *Spring* is best, *Autumn* indifferent, the rest of the year bad, and to be used but upon necessitie.
In Spring and Summer let the right arm bloud,
The Fall and Winter for the left more good.

Pond 1669.

For the time of the moneth.

Let not blood three days before nor three days after the change: nor the day before, nor the day after the conjunction of *Luna* and *Saturn*, or of *Luna* and *Mars*; nor when *Venus* and *Luna* be in conjunction, if *Venus* at the same time be combust. The best and fittest time is, when the *Moon* is aspected with *Jupiter* or *Venus* in combust; or in Sextile or Trine with *Sol* or *Mars*.

The time of the day.

The morning after Sun-rising fasting is the best: or in the after-noon towards evening after perfect digestion, if the air be temperate, and the wind not south.

Diet after bleeding.

*Sleep not presently, Stir not violently,
Feed but warily, Use no Veneries
Soon after Phlebotomie.*

But notwithstanding these rules let it be further observed, that for the *Pestilence*, the *Phrensie*, the *Plenrisie*, the *Squinacy*, the *Apoplexy*, a continual *Head-ach* growing of choler or blood, a hot burning fever, or any other extreme pain, we are not to tarry for a chosen time, but must presently with all convenient speed seek a remedie: but then blood is not to be let out in so great a quantity as if a chosen time were had.

And

Pond 1669.

And as for purging, take these rules,

The ☾ in ♀	Purge choler ♀ not combust	with

But see that the Moon be not in any of the signs that chew the cud; as *Aries, Taurus, Capricorn*: for then the medicine will stay but little with the Patient, causing him to vomit; unless you intend to purge by vomiting, for then indeed these signs are good. Also, in purging melancholy let not *Saturn* have the dominion; nor *Jupiter*, when you purge the sanguine; nor *Mars*, when you purge the cholerick.

How the moveable feasts are found readily.

Seek the change of the moon in *February* for that year ye desire the moveable feasts. Then note what day it falleth on, the next Tuesday is Shrove-tuesdays; but if the change be on Tuesday, the next Tuesday ensuing is it. The next Sunday is the first Sunday in Lent. Six Sundays after is Easter-day. Add 35 days or 5 weeks to Easter-day, and ye have Rogation-sunday. To that add 4 days, so ye have Ascension day: then have ye 10 days to Whitsunday. And 7 days after is Trinity-sunday.

Of the week.

of the week

A Week hath divers names: In *Latine* It is called *Septimana*, -à *septem & mane*, as it were having *septem matutina tempora*, seven mornings. It is also called *Hebdomas*, ab *ἑβδ* which is *septem*, as containing seven days. It is also called *Sabbatum* by the *Jews*, as appeareth by that sentence in Scripture: *Jejuno bis sabbato*, &c. where the word *Sabbatum* is *equivocum ad totam septimanam*. You may observe the *Jews* sabbath day was Saturday: but the *Christians* observe Sunday, which they call *dies Dominica*, The Lords day, because on that day *Christ Jesus*, our Lord and saviour, arose from the dead.

How to finde the age of the Moon.

Add to the Epact the number of moneths from the beginning of *March*, together with the moneth wherein you seek, and also the number of days past of that moneth wherein you seek, and such addition will shew you the age of the moon, if the sum of addition be less then 30; but if it exceed 30, then substraet 30, and the remainder shall be the age of the moon, if so be the moneth wherein you seek hath 31 days: but if it hath less then 31, substraet but 29, and the remainder shall be the age.

A

A rule to finde the Moons distance from the Sun; by which is gathered at all times the Signe and degree where the Moon is.

Multiply the age of the Moon by 4, divide by 10, the quotient sheweth the signes that the Moon differeth from the Sun; the remainder augmented by 3, bringeth degrees to be added: Ye must put these signes and degrees to the place of the Sun. The product, I mean the encrease or end of all these signes and degrees, in order counted from the Sun, declares the place of the Moon in the Zodiack.
